The undersigned (whose title is supplied below) is empowered to act on behalf of the assignee.

Pursuant to 37 CFR §1.321(b), and to obviate a double patenting rejection, the assignee referenced above hereby waives and disclaims the terminal portion of the term of the entire patent to be granted on the above-referenced application subsequent to the expiration date of the patent to be granted on U.S. Application Serial No. 10/215,594, whereby the patent to be granted on the above-referenced application and the patent to be granted on U.S. Application Serial No. 10/215,594 will expire on the same day, provided that any patent granted on the above-referenced application shall be enforceable only for and during such period that it is commonly owned with the patent to be granted on U.S. Application Serial No. 10/215,594.

The assignee referenced above does not disclaim any terminal part of any patent granted on the above-referenced application prior to the expiration date of the full statutory term of the patent to be granted on U.S. Application Serial No. 10/215,594 in the event that it later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR §1.321(a), has all claims cancelled by a reexamination certificate, or is otherwise terminated prior to expiration of its statutory term, except for the separation of legal title as stated above. Assignee herein does not disclaim or otherwise affect any part of the patent to be granted on U.S. Application Serial No. 10/215,594.

This disclaimer runs with any patent granted on the above-referenced application and is binding upon the grantee, its successors or assigns.
